

ERASMUS + ACTIVITIES: Learning about trees during English class (6th grade)

It was a beautiful spring day and we decided to take the English class outside and learn some new vocabulary in connection to trees.

We started the lesson by reading a short story about an apple tree and a man and through the story we learnt a very valuable lesson: We cannot only take advantage of the nature, but we have to take care of it.

We soon found out that the main topic of the lesson are trees. We learnt some new vocabulary connected to parts of a tree and different tree types, we searched for insect living on a tree and naming them, and so on.

It was a fun lesson, in which we have learnt a great deal, and we got to spend it outside. It is true, nature is really a wonderful teacher.
