

Cross-curriculum day- Cycling along the Sava river

The 8th and 9th graders embarked on a journey towards knowledge in a different manner on the 4th and 5th October- they went cycling. It was quite a different school day, not only because it was outside in the nature, but because we connected different subjects- P.E., physics, chemistry, geography, Slovene and English.

The road led us to the settlement called Vikrče and back to school, which is approximately 25 km. The pupils had to solve different exercises using a mobile application Actionbound on each stop. The fact that they were using their mobile phones made things even more fun.

Both days were very successful and we plan to learn this way in the future as well.

Bound: **S kolesom ob Savi 8. razred**

Pupils' opinions:

It was great! Classes done outside plus cycling is a winning combination! (Vid in Boris, 9. b)

We especially liked the fact that we didn't sit inside a classroom and we could exercise a little. We didn't deal with only one subject but many at the same time. We also liked the fact that we were outside. (Tia in Maja, 9. b)

It was lots of fun, as there was no classic studying at school. We were cycling the unknown paths, hung out with our classmates and learned, all at the same time. We could have more school days like this. (Ensar in Mark, 9. b)

It was interesting, as it was a different day at school. We learned a lot and

enjoyed the process of learning even more. (Špela in Tija, 9. b)

It was awesome, fun and animated. It would make things even better if we were divided into a faster and a slower group, so that we wouldn't have to wait so much. Other than that it was a very interesting day, way more than at school. (Adam in Gašper, 9. b)

Idejni vodje: Kristina Šturm, Nataša Pozdrec Intihar in Silvo Koželj.

Dan so pripravili in izvedli: Kristina Šturm, Nataša Pozdrec Intihar, Silvo Koželj, Lea Kofler, Nataša Škorjanc Strnad, Anamarija Lah Šuster.
